📍 Raval Josep Pané, 16 · 25211 Tarroja de Segarra, Lleida, Spain

Profile

Shipped console and mobile titles in Unity3D, and prototyped an ambitious project in Godot; self-taught, I enjoy learning new languages and technologies. I have worked both solo and in teams, using project management tools (version control, task trackers, shared documentation) to coordinate source code and documentation.

Experience

Game Developer · DABADU GAMES — 2017–2024

- Unity3D development of three videogames for iOS and Android, featured on the App Store and Google Play on multiple occasions.
- Lead developer of a videogame under license from a popular Japanese franchise, published by Netflix on iOS and Android and also ported to Nintendo Switch.
- Godot development of the prototype for a more ambitious project, including state machines and procedural level generation.

Team Lead & Mobile App Developer · MODDITY — 2014–2017 — Managed development of iOS and Android apps, leading programming teams.

Mobile App Programmer · BAZINGA SYSTEMS — 2011–2014 — Programmed iOS apps for iPhone and iPad.

Database App Programmer · BONÀREA — 2005–2010 — Programming and management of a food-product warehouse (stock, orders, inbound/outbound, staff time).
